

Questions you always had about Dogs answered using Twitter Data

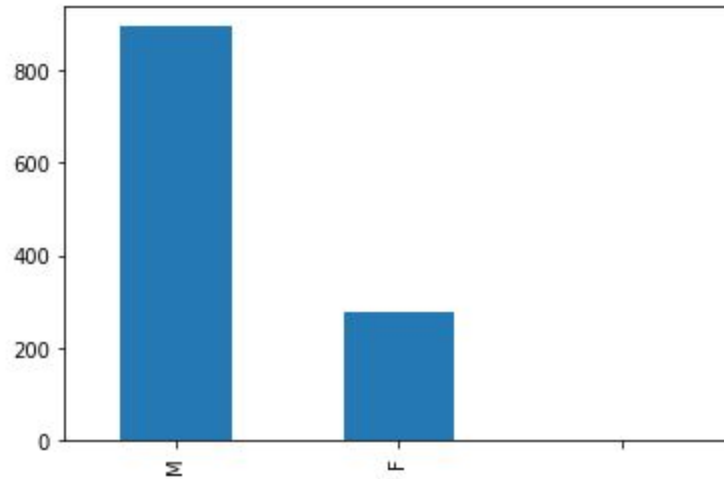

Since my childhood, I've always been in love with dogs. Though I couldn't get my own puppy unfortunately as my mother didn't allow, I would always try to play with them in the playground. I even used to google everything I could find about dogs. If my friends had any question about dogs, they would come to me.

One day going through my twitter feed I saw one twitter handle **@dog_rates(WeRateDogs)** which immediately caught my attention as you it was related to **DOGS !!!**. It is a twitter handle where dog owners tweet about their dogs and also give an image. Later on WeRateDogs give these dogs a rating. So, I thought that it would be great if I go through all their tweets and extract valuable information to answer the questions you always wanted to know about dogs!

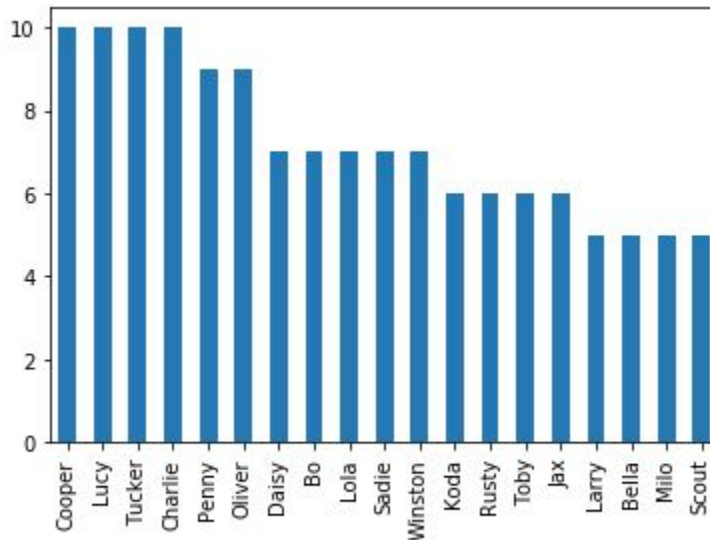

Is there a gender bias among Dogs too?

I thought that definitely there is no gender bias when it comes to dogs. But after analysing the data i found that i was wrong.

Is "Tommy" the most common dog name?

I always thought that Tommy was the most common dog name. Atleast 10 dogs in neighbourhood were named Tommy. Using the WeRateDogs data I found that Tommy is not even in the reckoning.

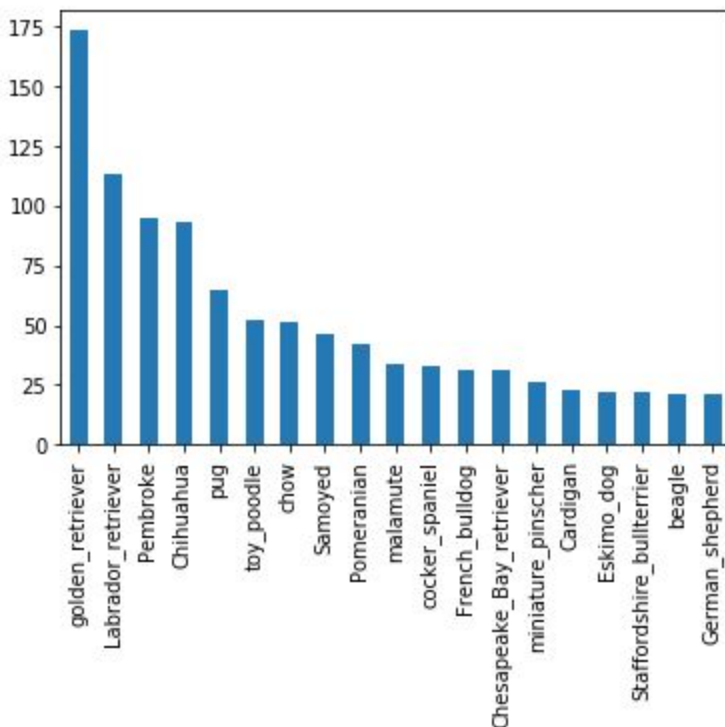

From the data I found that **Cooper, Lucy, Tucker** and **Charlie** are the most common dog names.

"German Shepherd" is the most famous dog breed. Isn't it?

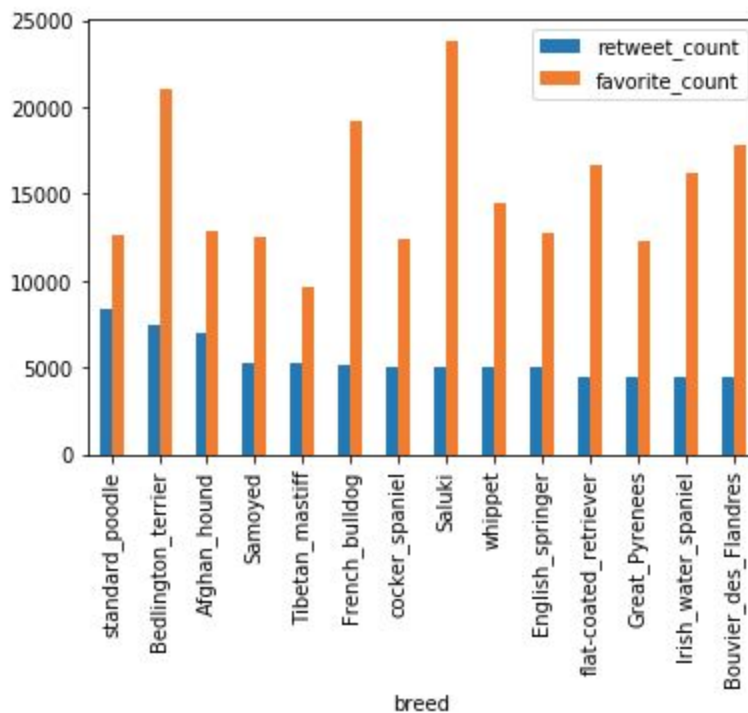

Look at this good-looking beast. How can't anyone love this dog. This has to be the most famous dog breed. Don't you think?

Let's see what the twitter data tells us.

Oops!! I was completely wrong. According to this data, **Golden Retriever** is the most popular breed of dogs.

I also studied the average retweet count and the favorite count.

Tweets of **Standard poodle** have been retweeted the most number of times while tweets of **Saluki** have been liked the most number of times.

So, this was my analysis which I used to answer frequently asked questions about dogs. Hope this has also answered your questions as well and provide you with useful information about dogs.
